Email Support Ticket

HD-1048

AUTHOR Alex Morgan (fictional) REVIEW Instructor demonstration STATUS Resolved; successful test print

Purpose and assessment context

A structured instructor-authored model for CIT-205. It illustrates how technical work becomes verifiable evidence. All incidents, measurements, approvals and names below are fabricated for teaching.

User's message

'My worksheet stays pending. I'm not sure if anyone else can print.' This anonymized text is a fictional support scenario.

Acknowledgment

'Thanks for reaching out. I understand this is delaying your classwork. Please confirm the printer name and any non-sensitive error displayed. Do not send passwords or private documents.'

Triage

Verified the shared training printer was reachable and printed from another device. Narrowed scope to the requesting workstation.

Investigation

Found paused local job. Asked permission before removing the requestor's own failed job. Did not modify shared printer settings.

Resolution

Recreated a non-sensitive test job. Page printed normally. Requestor confirmed printing and received plain-language closure email.

Follow-up

'If this recurs, please record the printer name, time, and exact message.' Status: resolved.

Evidence and verification matrix

STAGE	COMMUNICATION	WHY IT MATTERS	REVIEW
Acknowledgment	Clear next step	Sets expectation	PASS
Investigation	Consent sought	Limits impact	PASS
Resolution	Explains fix	Supports self-help	PASS

Reviewer handoff and quality assurance

Document: HD-1048 | Revision: 1.2 | Classification: public instructional example

Acceptance checklist

- ☐ Relevant user / system impact is defined without publishing confidential information.
- ☐ Expected outcomes are distinguished from the technician's actual observations.
- ☐ Every conclusion is supported by a specific test or appropriate evidence reference.
- ☐ Changes are authorized, reversible when appropriate, and documented.
- ☐ Closure includes verification, remaining risk, escalation, and reviewer disposition.
- ☐ Accessible language is used; screenshots and supporting files are safe for public release.

Evidence register (model references)

HD-1048 E-01 | Initial report or baseline. Synthetic exhibit reference, supplied to model documentation. Students replace with genuine, redacted records.

HD-1048 E-02 | Troubleshooting observations. Synthetic exhibit reference, supplied to model documentation. Students replace with genuine, redacted records.

HD-1048 E-03 | Change / review / authorization notes. Synthetic exhibit reference, supplied to model documentation. Students replace with genuine, redacted records.

HD-1048 E-04 | Final validation and user confirmation. Synthetic exhibit reference, supplied to model documentation. Students replace with genuine, redacted records.

Instructor review

What works: the record captures context, action, evidence and outcome. Before qualifying real student work, reviewers must inspect supporting artifacts and verify that any technical claim or metric is true.

Fictional review disposition: EXEMPLAR APPROVED FOR TEACHING ONLY.

Reflection and next action

The value of this artifact is not the final checkbox; it is the trace from an observed symptom through a defensible decision to validated results. A real student should explain one revision made after feedback and link the relevant commit.
