AUTHOR Alex Morgan (fictional) REVIEW Instructor demonstration STATUS Example profile text and verification checklist

Purpose and assessment context

A structured instructor-authored model for CIT-205. It illustrates how technical work becomes verifiable evidence. All incidents, measurements, approvals and names below are fabricated for teaching.

HEADLINE

IT Support Student | Service Desk & Documentation | Troubleshooting with Evidence.

ABOUT

'I approach IT support by documenting symptoms, narrowing scope, testing carefully, and confirming results with people. My portfolio shows how I learn, practice, operate, and qualify.'

FEATURED

Link to public portfolio homepage. Feature the strongest reviewed validation record, KB article, and support communication artifact.

EXPERIENCE

Present authentic academic mission work accurately as projects, not as paid work or production ownership when it was not.

SKILLS

Incident triage; technical writing; Windows endpoint validation; network diagnostics; GitHub collaboration; professional communication.

PRIVACY

Choose appropriate visibility, avoid student ID numbers, verify images have permission, and use professional contact channels.

PROFILE REVIEW

Check that headline matches resume, links open on mobile, descriptions reflect evidence, and no certifications are falsely claimed.

Evidence and verification matrix

SECTION	EXAMPLE	LINKED EVIDENCE	STATUS
Headline	Support + evidence	Portfolio	Ready
Featured	Strongest artifacts	KB-017, WV-026	Ready
About	Plain-language goals	Reflection	Ready

Reviewer handoff and quality assurance

Document: Alex Morgan | Digital identity | Revision: 1.2 | Classification: public instructional example

Acceptance checklist

- ☐ Relevant user / system impact is defined without publishing confidential information.
- ☐ Expected outcomes are distinguished from the technician's actual observations.
- ☐ Every conclusion is supported by a specific test or appropriate evidence reference.
- ☐ Changes are authorized, reversible when appropriate, and documented.
- ☐ Closure includes verification, remaining risk, escalation, and reviewer disposition.
- ☐ Accessible language is used; screenshots and supporting files are safe for public release.

Evidence register (model references)

Alex Morgan | Digital identity E-01 | Initial report or baseline. Synthetic exhibit reference, supplied to model documentation. Students replace with genuine, redacted records.

Alex Morgan | Digital identity E-02 | Troubleshooting observations. Synthetic exhibit reference, supplied to model documentation. Students replace with genuine, redacted records.

Alex Morgan | Digital identity E-03 | Change / review / authorization notes. Synthetic exhibit reference, supplied to model documentation. Students replace with genuine, redacted records.

Alex Morgan | Digital identity E-04 | Final validation and user confirmation. Synthetic exhibit reference, supplied to model documentation. Students replace with genuine, redacted records.

Instructor review

What works: the record captures context, action, evidence and outcome. Before qualifying real student work, reviewers must inspect supporting artifacts and verify that any technical claim or metric is true.

Fictional review disposition: EXEMPLAR APPROVED FOR TEACHING ONLY.

Reflection and next action

The value of this artifact is not the final checkbox; it is the trace from an observed symptom through a defensible decision to validated results. A real student should explain one revision made after feedback and link the relevant commit.
