HD-1042

AUTHOR Alex Morgan (fictional) REVIEW Instructor demonstration STATUS Resolved with caller confirmation

Purpose and assessment context

A structured instructor-authored model for CIT-205. It illustrates how technical work becomes verifiable evidence. All incidents, measurements, approvals and names below are fabricated for teaching.

Intake

09:12 inbound call from anonymous Student A; single shared workstation sign-in failed before a lab session.

Impact & priority

One user temporarily blocked; no evidence of service-wide outage. Priority P3; scope recorded before attempting remediation.

Call script

'I can help. What exactly appears on the screen? Please keep your password private. May we check your keyboard settings together?'

Investigation

At 09:14 recorded non-sensitive error; 09:16 confirmed account worked on authorized comparison device; 09:18 noticed alternate keyboard layout.

Resolution

Guided caller to expected layout without ever seeing password. At 09:22 student successfully signed in and confirmed access.

Closure

Category: access / sign-in / endpoint configuration. Root cause in this fictional scenario: mismatched layout. No escalation required.

Evidence and verification matrix

TIME	ACTIVITY	EVIDENCE	OUTCOME
09:12	Intake	Caller report	Open
09:16	Scope isolation	Account works elsewhere	Local symptom
09:18	Hypothesis	Layout indicator	Test
09:22	User test	Verbal confirmation	Resolved

Reviewer handoff and quality assurance

Document: HD-1042 | Revision: 1.2 | Classification: public instructional example

Acceptance checklist

- ☐ Relevant user / system impact is defined without publishing confidential information.
- ☐ Expected outcomes are distinguished from the technician's actual observations.
- ☐ Every conclusion is supported by a specific test or appropriate evidence reference.
- ☐ Changes are authorized, reversible when appropriate, and documented.
- ☐ Closure includes verification, remaining risk, escalation, and reviewer disposition.
- ☐ Accessible language is used; screenshots and supporting files are safe for public release.

Evidence register (model references)

HD-1042 E-01 | Initial report or baseline. Synthetic exhibit reference, supplied to model documentation. Students replace with genuine, redacted records.

HD-1042 E-02 | Troubleshooting observations. Synthetic exhibit reference, supplied to model documentation. Students replace with genuine, redacted records.

HD-1042 E-03 | Change / review / authorization notes. Synthetic exhibit reference, supplied to model documentation. Students replace with genuine, redacted records.

HD-1042 E-04 | Final validation and user confirmation. Synthetic exhibit reference, supplied to model documentation. Students replace with genuine, redacted records.

Instructor review

What works: the record captures context, action, evidence and outcome. Before qualifying real student work, reviewers must inspect supporting artifacts and verify that any technical claim or metric is true.

Fictional review disposition: EXEMPLAR APPROVED FOR TEACHING ONLY.

Reflection and next action

The value of this artifact is not the final checkbox; it is the trace from an observed symptom through a defensible decision to validated results. A real student should explain one revision made after feedback and link the relevant commit.
