Professional Resume

Alex Morgan | Career evidence

AUTHOR Alex Morgan (fictional) REVIEW Instructor demonstration STATUS Fictional resume for teaching

Purpose and assessment context

A structured instructor-authored model for CIT-205. It illustrates how technical work becomes verifiable evidence. All incidents, measurements, approvals and names below are fabricated for teaching.

ALEX MORGAN

Entry-Level IT Support Candidate | Portfolio: this fictional example. Do not treat this as a real person's resume.

PROFILE

Service-oriented technical learner able to isolate symptoms, validate endpoints, write repeatable procedures, and communicate support outcomes.

TECHNICAL CAPABILITIES

Windows workstation readiness checks; DNS and basic connectivity triage; incident documentation; knowledge base writing; GitHub change history; privacy-aware support.

SELECTED PROJECT

Endpoint Readiness Validation: drafted and tested a structured checklist with before/after evidence; documented an approved training DNS correction.

SELECTED PROJECT

Knowledge Base KB-017: authored service-desk procedure with expected/actual outcomes, safe escalation, and rollback guidance.

SELECTED PROJECT

Support Communication: documented phone and email intake, user impact, consent, verification, and clear closure.

EDUCATION

CIT-205 Help Desk & User Support (fictional course demonstration). Replace with actual institution, program, and dates before using a real resume.

PROFESSIONAL PRACTICE

Claims should always match artifacts that a potential employer can inspect. Avoid fabricated metrics or certifications.

Evidence and verification matrix

CAPABILITY	PORTFOLIO	STATUS	NOTE
Alex Morgan (fictional)	Student-Operated Technology Ecosystem	Instructor model, not operational evidence	

	EVIDENCE		
Troubleshooting	ACE-DT-006	Model	Branches verified
Documentation	KB-017	Model	Peer reviewed
Client support	HD-1042 / 1048	Model	User focused

Reviewer handoff and quality assurance

Document: Alex Morgan | Career evidence | Revision: 1.2 | Classification: public instructional example

Acceptance checklist

- ☐ Relevant user / system impact is defined without publishing confidential information.
- ☐ Expected outcomes are distinguished from the technician's actual observations.
- ☐ Every conclusion is supported by a specific test or appropriate evidence reference.
- ☐ Changes are authorized, reversible when appropriate, and documented.
- ☐ Closure includes verification, remaining risk, escalation, and reviewer disposition.
- ☐ Accessible language is used; screenshots and supporting files are safe for public release.

Evidence register (model references)

Alex Morgan | Career evidence E-01 | Initial report or baseline. Synthetic exhibit reference, supplied to model documentation. Students replace with genuine, redacted records.

Alex Morgan | Career evidence E-02 | Troubleshooting observations. Synthetic exhibit reference, supplied to model documentation. Students replace with genuine, redacted records.

Alex Morgan | Career evidence E-03 | Change / review / authorization notes. Synthetic exhibit reference, supplied to model documentation. Students replace with genuine, redacted records.

Alex Morgan | Career evidence E-04 | Final validation and user confirmation. Synthetic exhibit reference, supplied to model documentation. Students replace with genuine, redacted records.

Instructor review

What works: the record captures context, action, evidence and outcome. Before qualifying real student work, reviewers must inspect supporting artifacts and verify that any technical claim or metric is true.

Fictional review disposition: EXEMPLAR APPROVED FOR TEACHING ONLY.

Reflection and next action

The value of this artifact is not the final checkbox; it is the trace from an observed symptom through a defensible decision to validated results. A real student should explain one revision made after feedback and link the relevant commit.
