Ticket & Knowledge Review

REV-019

AUTHOR Alex Morgan (fictional) REVIEW Instructor demonstration STATUS Revisions verified after peer review

Purpose and assessment context

A structured instructor-authored model for CIT-205. It illustrates how technical work becomes verifiable evidence. All incidents, measurements, approvals and names below are fabricated for teaching.

Review scope

Evaluate fictional ticket HD-1042 and KB-017 for correctness, privacy, clarity, reproducibility, and audience suitability.

Finding 01

Initial ticket described the fix but omitted user verification. Severity: moderate. Recommendation: document verbal confirmation and time.

Finding 02

KB step said 'test DNS' without command objective or interpretation. Severity: moderate. Recommendation: specify expected and unexpected results.

Revision

Ticket closure updated with validation at 09:22. KB expanded to distinguish an IP path problem from hostname lookup failures.

Retest

Second reviewer followed KB with training data, reproduced the decision sequence, and found no confidential information.

Approval

Training review status: accepted for exemplar use. These are fictional approval entries, not genuine production signatures.

Evidence and verification matrix

ID	ISSUE	CORRECTION	STATUS
F-01	Missing user validation	Added test and confirmation	Closed
F-02	Ambiguous KB step	Added outcomes and branch logic	Closed
F-03	Privacy check	Anonymized identifiers	Closed

Reviewer handoff and quality assurance

Document: REV-019 | Revision: 1.2 | Classification: public instructional example

Acceptance checklist

- ☐ Relevant user / system impact is defined without publishing confidential information.
- ☐ Expected outcomes are distinguished from the technician's actual observations.
- ☐ Every conclusion is supported by a specific test or appropriate evidence reference.
- ☐ Changes are authorized, reversible when appropriate, and documented.
- ☐ Closure includes verification, remaining risk, escalation, and reviewer disposition.
- ☐ Accessible language is used; screenshots and supporting files are safe for public release.

Evidence register (model references)

REV-019 E-01 | Initial report or baseline. Synthetic exhibit reference, supplied to model documentation. Students replace with genuine, redacted records.

REV-019 E-02 | Troubleshooting observations. Synthetic exhibit reference, supplied to model documentation. Students replace with genuine, redacted records.

REV-019 E-03 | Change / review / authorization notes. Synthetic exhibit reference, supplied to model documentation. Students replace with genuine, redacted records.

REV-019 E-04 | Final validation and user confirmation. Synthetic exhibit reference, supplied to model documentation. Students replace with genuine, redacted records.

Instructor review

What works: the record captures context, action, evidence and outcome. Before qualifying real student work, reviewers must inspect supporting artifacts and verify that any technical claim or metric is true.

Fictional review disposition: EXEMPLAR APPROVED FOR TEACHING ONLY.

Reflection and next action

The value of this artifact is not the final checkbox; it is the trace from an observed symptom through a defensible decision to validated results. A real student should explain one revision made after feedback and link the relevant commit.
